

Course Number	<i>CSci 120</i>
Descriptive Title	<i>Object-oriented Programming</i>
Programming Language	<i>Java</i>

Problem Set Number	<i>1</i>
Problem Number	<i>2</i>
Activity Title	<i>Write, Compile, and Run TestGreeting</i>

Objective

In this exercise you will write, compile, and run Java code using existing classes.

Directions

1. Using a text editor, create a class named `TestGreeting`.
2. Create a `Greeting` object named `sampleGreet` and call the `greet` function of the class `Greeting`.
3. Compile and run your written code.
